## **se<sup>2</sup> recognized by Computerworld Honors Program**

*Recognition acknowledges visionary application of information technology*

**Topeka, KS** - se<sup>2</sup>, a division of Security Benefit, has been awarded Laureate status in the 2006 IDG Computerworld Honors Program. The program acknowledges those individuals and organizations that have used information technology to promote positive social and economic progress.

se<sup>2</sup> was nominated for the distinction based on its ability to provide a completely unique processing solution for annuity providers that addresses both the need for greater efficiencies and heightened regulatory and compliance scrutiny. The insurance and annuity processing company was among 227 Laureates named as part of the program this year. More than 300 organizations were nominated to the program.

"It's very gratifying to be recognized as an innovator and particularly to receive validation for our efforts to address in a unique way the emerging challenges of the insurance industry," said Dave Keith, president of se<sup>2</sup>.

Each year, members of the Computerworld Honors Program Chairman's Committee identify the organizations where the use of information technology has been especially noteworthy for the originality of its conception, the breadth of its vision and the significance of its benefit to society.

"The Computerworld Honors Program seeks to recognize organizations, from a variety of sectors, for their ongoing efforts to utilize technology in order to benefit society," said Bob Carrigan, chairman of the Computerworld Honors Program Chairmen's Committee and president of IDG Communications. "We are proud to provide a platform to publicly acknowledge these contributions."

Case studies submitted by the Laureates as part of the Computerworld Honors Program selection process become part of the Program's Global Archives. The information is available to researchers, students and scholars through [www.cwhonors.org](http://www.cwhonors.org), and through digital records housed in national archives in more than 100 universities, museums and research institutions throughout the world.

###
